What is the Long Term Care Program?

The Jefferson County Public Health Services provides clinical and supportive services that can be found in a skilled nursing facility but provide these services in the home. The program allows for chronically ill patients who otherwise require a nursing home to stay where they want...their own home. Under the direction of the patients' physician, an individualized, multidisciplinary plan of care will be coordinated by a nurse who will oversee and monitor the care plan on an ongoing basis. This program is authorized by Jefferson County Social Services under the Medicaid Program.

Who is eligible for Long Term Home Care?

Those who are Medicaid recipients or private pay individuals who have been assessed as medically eligible for nursing home level care. Physician approval is required.

A joint evaluation by a public health nurse and a Department of Social Services representative is made to determine eligibility. The medical, nursing, social and environmental assessment completed must indicate the program can meet the person's need in a home care setting.

Medicaid eligibility is determined by the Department of Social Services.

Who pays for Long Term Home Health Care?

- Medicare
- Medicaid
- Private Pay
- Long Term Care Insurance
