Jefferson County is participating with the State of New York to manage the outbreak of COVID 19 a.k.a. the coronavirus. The strategy for management of the virus is threefold - density reduction, identify and isolate, and lastly surge capacity for medical services. The actions administered will fit into one of these categories and we encourage the public to follow the guidelines issued by either the Centers for Disease Control (CDC), New York State or Jefferson County Public Health Department, as well as educate yourself on the current situation and seek the appropriate medical attention from a provider immediately if necessary.

Current Statistics for Test Results Received by Jefferson County Public Health

Positives: 2

Negatives: 61

Precautionary Quarantine: 194

Mandatory Quarantine: 2
